SUMMARY

I'm a self-taught, Frontend-focused Full Stack Developer specializing in React, Next.js, and scalable UI systems. Experienced in building and integrating AI-powered applications, authentication workflows, databases, APIs, responsive dashboards, and production-ready web platforms, with a strong focus on usability and frontend architecture.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer

03/2026 – 05/2026

IshtaCrafts

Remote

- Developed a full-stack e-commerce platform with secure authentication, product management, checkout functionality, and admin dashboards.
- Integrated payment processing and shipping APIs to streamline order management and fulfillment operations.
- Optimized application performance through caching and rate limiting strategies, improving response times under high traffic.

Founding Front-end Developer

10/2025 – 02/2026

Numora

Remote

- Developed responsive web interfaces with Next.js by implementing pixel-accurate designs from Figma.
- Designed reusable frontend components and built authentication-enabled features used across the platform.

SKILLS

Core Technologies

Next.js, React, TypeScript, JavaScript, Tailwind CSS, Module CSS, Node.js, NestJS, REST APIs

Databases

MongoDB, PostgreSQL, Firebase,

AI / LLM

Gemini API, Grok API, RAG

PROJECTS

Restaurant CRM 🔗

- Restaurants often struggle with disconnected systems, miscommunication between staff and kitchen, and order delays.
- DineFlow streamlines operations by bringing together order management, table tracking, kitchen workflows, staff coordination, and customer relationship tools.

Alldrives 🔗

- Tired of searching through folders and documents to find the information you need?
- Ask AI questions about your files in natural language, get instant summaries, insights, and complete tasks without manually digging through documents.

Yourmails 🔗

- Managing a growing inbox is difficult. Important emails get buried under newsletters, receipts, promotions, and notifications, forcing users to spend time manually organizing their emails.
- YourMails automatically labels and organizes emails using an AI-powered pipeline

Spotify-Analyzer 🔗

- Finding new music and creating playlists that truly match your taste can be time-consuming, while Spotify's default insights often don't reveal deeper listening patterns.
- Analyze your Spotify listening history to uncover music trends, understand your preferences, and generate personalized AI-powered playlists tailored to your mood and taste.
